

WRIST CAMERA

A wrist camera for Reach Bravo manipulators

Clear vision where it's most needed

YOUR EYES, UNDERWATER.

The Reach Bravo Wrist Camera gives operators clear vision at the end-effector of their manipulator. Situated just before the wrist rotate stage, this module is a must for complex intervention and inspection, augmenting the vision provided by the vehicle camera. Improve operator situational awareness and improve task accuracy and efficiency.

- ELECTRICAL

COMS	Ethernet (RTSP Stream)
Voltage	12-48V

- ENVIRONMENTAL

Depth	300MSW
